

Ingate solutions for Microsoft® Lync®

Microsoft recommends an E-SBC to provide connectivity, security and interoperability when connecting the Lync environment to a SIP trunk service. Ingate E-SBCs are qualified by Microsoft's Unified Communications Open Interoperability Program for Microsoft Lync.

For a secure and reliable use of Microsoft Lync applications the following items are recommended:

- Ingate E-SBC (The Ingate E-SBC product range can handle up to 20,000 concurrent calls)
- Ingate SIP Trunking module (Solves among other things interoperability issues between the SIP trunking service and Microsoft environment)
- Ingate SIP session licenses (Depends on how many concurrent calls requested)

Optionally

- Ingate Enhanced Security module (Encryption, TLS and SRTP, Transcoding (Now included in Ingate base product))
- Ingate Quality of Service (QoS) module (Traffic shaping and prioritizing of media services)
- Additional Trunk Group module (For additional ITSP connection)

Recommended Ingate solutions for Microsoft Lync deployment (Small – mid range solutions)

The following bundle offerings are recommended for the Ingate products with Microsoft® Lync® solutions. Additional Ingate licenses and modules are offered according to Ingate's standard current pricelist. Prices viewed below are list prices.

IGB-START-01, Ingate SIParator® 21, incl. 5 session lic. + SIP trunking module

IGB-01T1-01, Ingate SIParator® 21, incl. 25 session lic. + SIP trunking module

IGB-03T1-01, Ingate SIParator® 21, incl. 50 session lic. + SIP trunking module

IGB-02E1-00, Ingate SIParator® 51, incl. 60 session lic. + SIP trunking module
(Possible to software upgrade this hardware unit up to 1,000 concurrent SIP sessions)

Ingate E-SBCs are easy to deploy with Ingate's own StartUp Tool and are simple to configure and manage via the Ingate Web GUI.
