Welcome to the Ingate SIParator Training and Become Certified on the Ingate E-SBC products!

Learn the ins and outs of working with Ingate SIParator/Firewalls to enable SIP trunking and all SIP based unified communications faster than ever before. Through practical exercises this training will give you a better knowledge and understanding of the product and how to manage it efficiently. Join the Ingate SIParator training in Stockholm, Sweden and become certified on the Ingate SIParator/Firewall products.

Time: December 7-8, 2016
Place: Ingate Office in Stockholm, Sweden.
Address: Rissneleden 45, Sundbyberg, Sweden
For: Engineers who works with the Ingate SIParator/Firewall products

Following is an extract from the agenda:

- The SIP protocol - design and functionality
- The role of an SBC
- SIP and firewalls – issues and solutions
- SIP implementations with Ingate products
- Ingate products from a SIP perspective
- Review of the SIP-related parts in Ingate's configuration GUI
- Practical exercises in configuring Ingate SIParator/Firewall products

Prerequisites for attending the Ingate SIParator® Training:

- General knowledge of data networks
- Basic TCP/IP knowledge and associated protocols
- IP addressing and subnetting
- Routing
- NAT (Network Address Translation), public and private IP-addressing
- Basic firewalling concept
- Basic firewall hands-on experience

A basic SIP course at SIP School, http://thesipschool.com/ is recommended if you can't fulfill above requirements before the Ingate SIParator Training.

Make your reservations today and confirm your attendance to Christian at sales@ingate.com, before 22th of November. Seats are available on a first-come, first-served basis. Your application is binding whether you attend the class or not. If you have any questions please contact sales@ingate.com or telephone: +46 8 6007750. The cost for the training is 850 Euro per person.
