

How To Guide

blocking public/WAN hosts

17 March 2010

Tested versions: Ingate Firewall version(s): 4.6.x
Tested versions: Ingate Firewall version(s): 4.7.x
Tested versions: Ingate Firewall version(s): 4.8.x

Revision History:

Revision	Date	Author	Comments
1.00	17/03/10	Paul Donald	First Public Release

Information forthwith is provided as-is and is not warranted for any purpose other than use with Ingate units. For errors and omissions, please contact support@ingate.com quoting this document.

01 Define the hosts

Administration Basic Configuration **Network** Rules and Relays SIP Services SIP Traffic Virtual Private Networks Quality of Service Logging and Tools About

Networks and Computers Default Gateways All Interfaces NAT VLAN Eth0 Eth1 Interface Status PPPoE

Name	Subgroup	Lower Limit		Upper Limit (for IP ranges)		Interface/VLAN	Delete Row
		DNS Name or IP Address	IP Address	DNS Name or IP Address	IP Address		
+ Block_hosts	-	google.se	74.125.77.104	google.se	74.125.77.104	Ethernet1 (eth1 untagged)	<input type="checkbox"/>
	-	maps.google.com	74.125.79.104			-	<input type="checkbox"/>
	alice					-	<input type="checkbox"/>
+ LAN	-	192.168.1.0	192.168.1.0	192.168.1.255	192.168.1.255	Ethernet0 (eth0 untagged)	<input type="checkbox"/>
+ alice	-	1.2.3.4	1.2.3.4			-	<input type="checkbox"/>

02 Define the rules for the hosts

Administration Basic Configuration Network **Rules and Relays** SIP Services SIP Traffic Virtual Private Networks Quality of Service Logging and Tools About

Rules Relays DHCP Relay Services Protocols Time Classes

Rule No.	Active	Client	From IPsec Peer	Server	To IPsec Peer	Direction	Service	Action	Time Class	Log Class	Comment	Delete Row
1	Yes	LAN	-	Block_hosts	-	Ethernet0 Interface --> Indeterminate	icmp/udp/tcp	Discard	24/7	Local	Block	<input type="checkbox"/>

03 Apply the configuration

Administration Basic Configuration Network Rules and Relays SIP Services SIP Traffic Virtual Private Networks Quality of Service Logging and Tools About

Save/Load Configuration Show Configuration User Administration Upgrade Table Look Date and Time Restart Change Language

Test Run and Apply Conf [\(Help\)](#)

Duration of limited test mode:

seconds
